For more information about the Orientation Sensor in App Inventor, go to http://appinventor.pevest.com/?p=205
Or scan the QR code with your phone or tablet!

Turn off 'Auto-rotate screen' in Settings | Display

To use, tilt phone up, down, sideways to make sprite move on screen

When OrientationChanged event occurs, copy the sensor's 'Angle' to the sprite's Heading to change direction

'Magnitude' has a value between 0 and 1; multiply by a large constant to translate to a useful 'Speed'

An 'EdgeReached' event happens when collides with edge of Canvas. Call 'Bounce' method with the 'edge' it hit to bounce in new direction.
